

LED SGS Solutions Inc.

We put the power in your hands...

NEW REVOLUTIONARY SHOW 12 KIT

Showbattery™ is the award-winning product that is changing the Exhibit industry. As LED lights get brighter and more efficient the need for conventional electricity is eliminated. We have devised a lithium ion battery capable of powering LED light for up to 8hrs+ and best of all we have combined this with our newly designed 12 watt arm lights to bring you a complete turnkey solution, powerful enough to light your entire booth. Exhibitors can now save on electrical costs and control the lighting in their booth environment.

SAVE MONEY! NO HIGH-COST POWER RENTAL

- Powerful enough to light your entire booth
- Small enough to fit in an island display
- Lower or completely eliminate your electrical power rental costs
- No need for expensive, time-consuming under-carpet outlets or expensive sub floor

QUICK AND EASY INSTALLATION

- Lightweight and compact for easy transportation
- Flexible enough to run where wiring can't go, e.g. island display or outdoors
- No more waiting for power installation
- No more ordering deadlines or rate increases
- Quick charge to full power in 6 hours

Specifications
